Optimec Limited

Precision Lens Measurement

Hello folks,
I'll be brief on this occasion as I know that if you are half as busy as we are here at Optimec then you'll feel you really don't have time to read long e-mails!

Investment is the first theme I want to touch on and I'm pleased to be able to announce here some major new investment in manufacturing space and the very latest CNC machining technology. The team here at Optimec are all very excited about this and we they all hope you will be too.

Quality is my second theme and I'm really pleased and proud to be announcing a "doubling" of the standard guarantee on all new Optimec products.

In fact, all things considered we have quite a lot to talk about. If you would like to sit down and have a chat with us I can think of

35 Years - Actually We're Just Getting Started

Optimec[®] Limited
Soft Contact Lens Metrology

Celebrating 35 years in Business is one thing but where do you go from there? Recently in these newsletters I've highlighted some of the significant events that have occurred in Soft Lens metrology over the years. Unsurprisingly, Optimec has had a large part to play in many of those events and you'll no doubt be pleased to hear that isn't about to change anytime soon. During the last couple of weeks the manufacturing team have been adapting their process to allow for the start of works that will see a 60% increase in the size of the production facility at our factory. That's quite a sizeable increase by any measure but it's been brought about purely by an increase in demand for our instruments.

Not only are we manufacturing more instruments but we're manufacturing a greater range. With the incorporation of new

no better time and place than the upcoming EFCLIN Congress & Exhibition in Berlin. I hope to see you there.

In the meantime if you'd like any information about any Optimec products, including [JCF](#), [TSC3](#), [SAG](#) and [JCM](#), please don't hesitate to get in touch. Just give us a call on +44 (0)1684 892859. Alternatively you can e-mail us on info@optimec.com

Colin Richards
Operations Director

measurement principles, greater accuracy in saline temperature control and an ever increasing requirement for control of microbial contaminants, the Optimec product range has never been larger.

However, manufacturing space is only part of the story....

Optimec's reputation is one based not just on unique measurement principles but also well engineered and durable products that can stand the test of time. So we're taking those attributes and enhancing them further still by investing in major new manufacturing infrastructure. We are about to start commissioning an installation of the very latest CNC machining centres that will allow us to manufacture key components to previously unattainable levels of accuracy and reproducibility.

The impact of this "indexing" of quality will allow us to offer an industry leading guarantee. Our

new product range will be guaranteed for 2 years from date of manufacture as will all repairs carried out by us using genuine Optimec parts. This should give you some idea of the level of confidence we have in our products.

If you like to know more about any aspect of the Optimec product range, or how you might benefit from the enhanced guarantees just give us a call on +44 (0)1684 892859 and we'll tell you. Alternatively you can e-mail us on info@optimec.com

Don't Forget To Look Us Up In Berlin

The Optimec team and our full range of products will be at the 41st EFCLIN Congress & Exhibition from the 8th-10th May in Berlin, Germany. Whatever your role in the industry it really is the place to be.

You can get further details by visiting www.efclin.com and clicking on the congress links. If you wish to register as a delegate straight away you can do so by going [here](#). You can also download an advance copy of the

Congress Programme by clicking [here](#).
If you like to make a specific appointment with
the Optimec team or see a specific product at
the show then give us a call on +44 (0)1684
892859 or e-mail us on info@optimec.com
