Optimec Limited

Precision Lens Measurement

*Hello folks,
Just a short time since my last
newsletter to you but we wanted to
mention a couple of important topics
again.*

*First of all the "Hunt for the Old
Optimec" is picking up pace! Thanks to
all those who have responded so far,
but we are still interested in hearing
from more of you. We know that
Optimec instruments have been doing a
quiet, unassuming and hard working job
in thousands of labs for many
years....we just want to find out how old
is the oldest one!*

*The exhibition and congress season is
upon us and for Optimec that means the
biggest event in the calendar, the
EFCLIN congress & Exhibition. You'll*

We're Still Looking For That Old Optimec!

*You'll recall that the last time I wrote to you I spoke
about our search for the oldest Optimec instrument.
Linked to our 35th Anniversary Celebrations we
though it might be fun to find out just how "long
lived" these famously durable instruments of ours
are.*

*That was the challenge and already many of you
have responded. Currently amongst the front
runners we have "proud" owners contacting us with
instruments that were manufactured in August
1998 and March 1997 respectively. Now that is
pretty old....but, we think there are older
instruments out there...still functioning! How do we
know that? Well it's simply because we have had*

find more details in this newsletter and of course on the EFCLIN website to if you go [here](#).

I'll be there with the Optimec team and our most popular products including [JCF](#), [TSC3](#), [SAG](#) and [JCM](#). So, if you'd like to get "hands on" with an Optimec product then Berlin is the place to be in May. We might also have the odd surprise too!

If you're involved in the contact lens or IOL industry then you really should be there.

That's all for now & thanks for reading. If you have any questions about any Optimec product I can be reached by e-mail [here](#).

Just a final reminder about the "Old Optimec" competition..if you have anything that looks like any of these below then you could be in with a real chance of winning...take a look in those cupboards and store rooms!

Colin Richards
Operations Director

many such instruments back to our our facility for routine maintenance in the last few years and, needless to say, they left us in fine condition!

So, here's the challenge...we are asking all our customers to open up those cupboards, visit the storerooms and basements...maybe even the attic and dust off whatever old instruments you can find! The 35 year old Optimec is out there somewhere and if you can help us find it and return it to take pride of place in the Optimec "Museum" we'll replace it with one of our most up to date instruments...and a special commemorative edition at that. All we need to set things in motion is an e-mail from you with a few digital images and, if possible the details from the serial number plate on the back of the instrument...then, we'll do the rest. Not sure how old your Optimec Instrument is anyway? Just give us a call on +44 (0)1684 892859 and we'll tell you. Alternatively you can e-mail us on info@optimec.com, We'll announce the results at this year's [EFCLIN Congress & Exhibition](#) from the 8th-10th May in Berlin, Germany.

Optimec instruments are manufactured in such "durable" fashion that we're sure the 35 year old example is out there somewhere...we need your help to find it...happy hunting!

If you would like to know more about the [JCF](#), [TSC3](#) or any of the Optimec range of instruments then visit our website, e-mail me personally on crichards@optimec.com or give us a call on +44 (0)1684 892859

EFCLIN Congress Fast

Approaching. Join Us In Berlin - 8th-10th May 2014

Time is running out if you want to register for the [41st EFCLIN Congress & Exhibition](#) from the 8th-10th May this year in Berlin, Germany. All the Optimec team will be there and we'll have all our most popular products on show. We would love to see you at the show but whether you are visiting us on the Optimec booth or not you really should be at the congress...after all, the rest of the contact lens industry will be!

You can get further details by visiting www.efclin.com and clicking on the congress links. If you wish to register as a delegate straight away you can do so by going [here](#). You can also download an advance copy of the Congress Programme by clicking [here](#). If you like to make a specific appointment with the Optimec team or see a specific product at the show then give us a call on +44 (0)1684 892859 or e-mail us on info@optimec.com
